19- $i = 600A$

$\Delta V = 12V$ (CTE)

$75A \Rightarrow 1\,hr$

límite de tensión $= 11\,V$

$$R = \frac{\Delta V}{i} = \frac{1V}{600A}$$

$$R \simeq 1{,}6 \cdot 10^{-3}\,R$$

$\rho_{Cu} = 1{,}72 \cdot 10^{-8}\ \Omega m$

$\ell = 2m$

$$A = \rho \cdot \frac{\ell}{R} = \frac{1{,}72 \cdot 10^{-8}\ \Omega m \cdot 2m}{1/600}$$

$A = 2{,}064 \cdot 10^{-5}\,m^2$

$$A = \frac{\pi d^2}{4} \Rightarrow d = \sqrt{\frac{4A}{\pi}} = 5{,}126 \cdot 10^{-3}\,m$$
